

# Salmon fishing on the Samarga River

## CATCH AND RELEASE FISH

River Samarga is the northern river placed in the wild part of Primorsky Territory. Riverbanks are almost uninhabited, there are only 2 villages where live the native people of this area. It is a great place for fishing. You can catch here rapacious char, multi-colored grayling, white spotted greenling, sharp-toothed East Siberian char, trout, etc. You can also catch Sakhalin taimen (*Hucho Perryi*). It is one of the greatest and oldest fish of salmon, which is sometimes called “water tiger”. Its length can be more than 1 meter, and weight more than 50 kg. Catching of such a fish requires a lot of effort. But the result exceeds expectations. Unfortunately as same as a real tiger the population of taimen is extremely getting down, so the caught fish will be released.

We offer you to enjoy the rich fishing in one of the picturesque spots of Primorsky Krai and make a challenge to Water Tiger – Taimen.
