

Beautiful Lena

The Lena River is one of the world's greatest rivers. It stretches 4400 km from the upper reaches in the Baikal mountain chain to the Arctic Ocean. The national park "Lena Pillars" is a nice place for nature lovers and those who look for new impressions. The Lena Pillars are steep rocks formed by the Cambrian limestone. Time, sediments, river water and wind gave intricate shapes to these rocks. We would like to offer you a cruise along Lena to these unique nature formations.
